900 MHz WIRELESS TELEPHONE

KX-T7885

900 MHz Multi-Line Wireless Telephone

Now there's no need to wait at your desk for those important phone calls! The KX-T7885 proprietary multi-line wireless phone gives you the mobility and clarity of 900 MHz operation, plus the functionality of a powerful system phone. Just clip the compact handset to your belt or purse and you're ready to take or make calls from anywhere within range. An essential communications tool for both busy offices and homes, the KX-T7885 can accommodate as many as 12 CO lines. It also possesses a host of sophisticated features that you can control with the handset's flexible keys and function buttons. A 3-line LCD readout helps make it easy to use and a headset jack lets you connect an optional hands-free headset. It's the ideal phone for people on the go!

■ 900 MHz Wireless Operation

Provides clear sound, enhanced range and reduced interference from radios, computer monitors and fluorescent lighting compared to ordinary wireless phones.

■ Flexible Keys for up to 12 CO Lines

The portable handset features 4 flexible keys with 3 positions each. In PBX mode, these keys can be programmed to access a total of up to 12 CO (central office) lines, system features or a combination of both. In SLT mode, they can be used to store 12 telephone numbers for convenient one-touch dialing.

■ Caller ID Compatible*

When integrated with a Panasonic Digital Super Hybrid or Super Hybrid phone system, the KX-T7885 can display an incoming caller's phone number or name for effective call screening.

■ 6 Ringer Modes

The KX-T7885 features 6 different ringer modes. There are standard high, medium and low rings, as well as a step ringer that gradually increases in volume. The vibrator ring is perfect for use in situations when an audible ring would not be desirable. Additionally, the ringer can be set to the OFF position.

■ 3-Line Multi-Function LCD Readout

Provides helpful information like Caller ID data*, call information, line status, and flexible key number or name. It also features indicators for programming mode, intercom mode, message waiting status and more.

■ Hands-Free Headset Jack

Now there's no need to interrupt your workflow just to answer the phone. You can connect an optional hands-free headset to the KX-T7885 for automatic answering of intercom calls, plus access to features like BGM and Paging.

■ Combination Buttons

By pressing the FUNC key and one of the assigned numerical keys, you can access certain features including Pause, Conference, Call Forward, DND and Flash.

■ Wall-Mountable Base Antenna

You can keep the handset cradle on your desk and position the base antenna in a location that is central to your workspace, enabling you to maximize your range within that space.

■ Handset Cradle/Spare Battery Charger**

Allows you to charge a spare battery*** while using another in the handset.

■ 12 One-Touch and 10 Auto Dial Numbers****

Allows you to store up to 12 phone numbers for one-touch dialing. You can also store 10 additional numbers for convenient speed dialing. Each phone number can be up to 20 digits in length, enabling you to include access codes.

■ High Capacity, Quick Charging NiMH Battery

■ Handy Belt Clip

■ Message Waiting Indicator

■ 30-Channel Auto Scanning

■ Handset Locator

■ Sound Charger™ Noise Reduction Technology

■ FWD, DND, Redial, Transfer and Hold Keys
